Santa Clara University, Santa Clara, CA

Expected Graduation December 2026

- *Bachelor of Science in Computer Science*
- *Relevant Coursework:* Web Usability, Computer Graphics, The Design and Management of Software

Google UX Design Professional Certificate, Google

Aug 2025

WORK EXPERIENCE

Founder & Independent Designer, VioletCraftworks, San Jose, CA

Feb 2025 – Present

- Founded and scaled an independent digital design brand to 400+ sales across 27 products, owning brand identity, product design, engineering, marketing, and customer support end-to-end.
- Designed and engineered a custom Next.js storefront with dynamic product routing, Stripe checkout with automated PDF delivery, blog, and an educational content library.
- Built a complete brand identity system spanning color palette, typography, logo, product photography, listing thumbnails, and PDF pattern layouts.

Data Physics Corporation, Software Intern, San Jose, CA

June 2024 – September 2024

- Sole designer and developer of a Flutter mobile app: owned the full stack from Figma mockups through frontend implementation and backend data pipeline, shipping a real-time signal visualization tool used by on-site engineers.
- Drove 8+ feedback-driven design iterations with engineering and product stakeholders, refining information hierarchy, control patterns, and edge-case handling.
- Leveraged Claude Code and ChatGPT to accelerate prototyping, generating layout variations and UI copy faster than manual workflows while maintaining visual consistency across 6+ screen states.

Mocaa, UX & Marketing Intern, Remote

July 2023 – September 2023

- Ran undercover customer interviews to audit the homepage and booking flow, identifying 8 friction points; 75% of proposed UI fixes were adopted into production.
- Produced social media content, blog posts, and brand partnership outreach; used Canva to create marketing assets across campaigns.

PROJECTS

Mixflow, Music Player Web App, UX Research, UI Design, Front-End Dev

September 2025 – Dec 2025

- UX researcher, UI designer, and sole front-end developer on Mixflow – researched, designed, and shipped a music player web app with a shuffle redesign and listening analytics dashboard.
- Conducted competitive analysis of Spotify, Apple Music, and YouTube Music; ran user interviews to surface shuffle frustration and translated findings into four playback modes.

LeftoverChef, Recipe + Leftover Management Web App, Lead Graphic Designer

Oct 2025 – Dec 2025

- Designed end-to-end UX for a leftover tracking and recipe discovery platform, mapped 5 core user journeys from inventory entry through recipe selection across multiple system states.
- Translated qualitative user research into information architecture and acceptance criteria and shipped a responsive web UI.

TECHNICAL SKILLS

- Design & UX: User flows, wireframing, prototyping, interaction design, state & flow diagrams, user research, usability audits & testing, UX behavior specs, design QA, visual consistency, systems thinking
- Frameworks & Tools: Figma, Adobe Illustrator, Canva, Git/GitHub, Claude Code, AI-assisted design workflows
